ZD510-HC Z-Band Wristbands

Zebra's ZD510-HC allows you to print patient information and barcodes directly on Z-Band direct thermal wristbands.

In addition, Zebra's Z-Band direct thermal wristbands:

- Features a silver antimicrobial coating that protects the wristband
- Enable staff to quickly and easily print and securely fasten in less than a minute using an adhesive tab or color clip
- Zebra's Z-Band wristbands are made of polypropylene. The direct thermal imaging chemistry is composed primarily of leuco dyes and developers. The inks/varnishes used are UV varnishes and water based inks. There is no metal content in or on these particular patient identification bands. Therefore, Z-Band wristbands are considered to be MR-Safe
- Latex-free

A barcode that fails to scan or requires repeated attempts to scan jeopardizes patient safety and staff productivity. Zebra's supplies research and development team tested the image durability of Z-Band direct thermal wristbands to ensure optimum image durability and scanning performance.

Zebra Z-Band wristbands are up to six times more durable against a common hand sanitizer than the leading competitor. For more details on the durability testing performed, please download our white paper on www.zebra.com/wristbands titled "Putting Wristband Durability to the Test".

Zebra Z-Band wristbands are available with adhesive or clip closure, in a variety of sizes and colors to meet your organization's needs.

Z-Band Direct	Part Number	Size	
<ul style="list-style-type: none"> • Classic wristband • Adhesive closure • Resistance to hand sanitizers such as Purell® 	Adult
